4.1 Services and supplies required in the diagnosis and treatment of illness or injury involving the musculoskeletal system are covered. U.S. Food and Drug Administration (FDA) approved surgically implanted devices are also covered.

4.2 Effective August 25, 1997, Autologous Chondrocyte Implantation (ACI) surgery for the repair of clinically significant, symptomatic, cartilaginous defects of the femoral condyle (medial, lateral or trochlear) caused by acute or repetitive trauma is a covered procedure. The autologous cultured chondrocytes must be approved by the FDA.

4.3 Single or multilevel anterior cervical microdiskectomy with allogeneic or autogeneic iliac crest grafting and anterior plating is covered for the treatment of cervical spondylosis.

4.4 Percutaneous vertebroplasty (CPT\textsuperscript{1} procedure codes 22520-22522, S2360, S2361) and balloon kyphoplasty (CPT\textsuperscript{1} procedure codes 22523-22525) are covered for the treatment of painful osteolytic lesions and osteoporotic compression fractures refractory to conservative medical treatment.

4.5 Total Ankle Replacement (TAR) (CPT\textsuperscript{1} procedure codes 27702 and 27703) surgery is covered if the device is FDA approved and the use is for an FDA approved indication. However, a medical necessity review is required in case of marked varus or valgus deformity.

4.6 Core decompression of the femoral head (hip) for early ( precollapse stage I or II) avascular necrosis may be considered for cost-sharing.

4.7 Single-level, cervical Total Disc Replacement (TDR) (CPT\textsuperscript{2} procedure code 22856) using an FDA approved cervical artificial intervertebral disc for the treatment of cervical DDD, intractable radiculopathy, and/or myelopathy is covered if the disc is used in accordance with its FDA labeled indications.

4.8 High Energy Extracorporeal Shock Wave Therapy (HE ESWT) for the treatment of plantar fasciitis is covered when all of the following conditions are met:

- Patients have chronic plantar fasciitis of at least six months duration;
- Patients have undergone and failed six months of appropriate conservative therapy; and
- HE ESWT is defined as Energy Flux Density (EFD) greater than 0.12 millijoules per square millimeter (mJ/mm\textsuperscript{2}).
