

CHAPTER 7
SECTION 3.2

ELECTRIC-POWERED, CART-TYPE VEHICLES

Issue Date: December 29, 1982

Authority: [32 CFR 199.4\(d\)\(3\)\(ii\)](#)

I. DESCRIPTION

An electric-powered, cart-type vehicles generally are three-wheeled battery operated vehicles that simulate small golf carts. They are small, light-weight vehicles that have a short turning radius and are easily maneuverable in an individual's home. This easy maneuverability is the primary advantage over electric wheelchairs.

II. POLICY

A. Electric-powered, cart-type transports may be cost-shared as an alternative to an electric wheelchair.

B. Electric-powered, cart-type transports are subject to the durable medical equipment requirements.

C. Benefits will not be extended for the use of both an electric-powered, cart-type vehicle and an electric wheelchair during the same period of time.
