2.0. MACHINE READABLE RECORDS

Files are maintained the same length of time as the records to which they relate. Included is all documentation of the systems and programs by which these records are maintained and generated. Example: Claims history files are kept six years the same as hardcopy records. Documents required in addition to actual machine-readable records include the following:

2.1. Master Files

These files constitute the definitive state of a data file in a system at a given time. Such files are categorized herein only partly on the basis of subject content. Other important considerations regarding disposition are the format of the data file and the manner in which it is updated. Such variables influence the informational value of a file.

2.2. Processing Files

Those machine-readable files, aside from master files, which comprise the life cycle of most computerized records prior to the production of a given master file. Processing files, from work files and input or source files to some valid transaction files, are employed to create and use a master file. They are presented here separately from master files for the sake of clarity and because they generally do not qualify for long-term retention.

2.3. Documentation

Data systems documentation are those records required for servicing machine-readable records, i.e., for converting from human-readable information to encoded data and vice versa. These are an organized series of descriptive documents required to initiate, develop, operate and maintain specific applications of ADP systems. The disposition of documentation is linked to the disposition of the related ADP system and the machine readable files. These files must be accessible to the Government upon request.

3.0. DISPOSITION INSTRUCTIONS

Disposition instructions and retention periods for TRICARE records are published in the DoD AI-15. The retention period begins at the date the record is closed, unless otherwise indicated. The periods of retention normally shall be accomplished as shown in the following paragraphs. These retention periods have been established in accordance with records management regulations approved by the Archivist of the United States. Recommendations for changes to retention periods and disposition procedures shall be submitted to the TMA Records Management Officer for approval.

3.1. Records With One-Month Retention

Records having a retention period of one month or 30 days shall be cut off at the end of the month, held one month in the current files area, and then destroyed. Example: Cut off April 30, 2002, Destroy June 2002.

3.2. Records With Three-Months Retention

Records having a retention period of three months or 90 days shall be cut off at the end of each quarter, held three months in the current files area, and then destroyed. Example: Cut off June 30, 2003, Destroy October 2003.

TRICARE OPERATIONS MANUAL 6010.51-M, AUGUST 1, 2002

CHAPTER 2, SECTION 2

SUBJECT, DESCRIPTION, INDEXING, SERIES NUMBER, DISPOSITION AUTHORITY, AND STORAGE LOCATION
OF GOVERNMENT RECORDS

3.3. Records With One-Year Retention

Records having a retention period of one year shall be cut off at the end of the calendar year, held one additional year in the current files area, and then destroyed. Example: Cut off December 31, 2002, Destroy January 2004.

3.4. Records With Two To Ten-Year Retention

Records having retention periods of two to ten years shall be cut off at the end of the calendar year; held one year after cutoff in the current files area, and then maintained, transferred or destroyed as specified. Example: six years cut-off December 2002, destroy January 2009.
