

## DATA REQUIREMENTS - DEFAULT VALUES FOR COMPLETE CLAIM DENIALS

---

The values used as defaults can be used only on complete claim denials and only when the appropriate value is not available from the claim and/or supporting documents, history, provider file, or other available resources. Thus, the defaults are element-specific and are not to be used as a “blanket” approach for complete claim denials, edits are in place to ensure appropriate reporting of defaults.

The following is arranged in alphabetical order, with those elements that are common to both Institutional and Non-Institutional addressed first, then the Institutional-specific elements followed by the Non-Institutional-specific elements. Where “N/D” (no default) appears, the TED must be reported in accordance with current requirements. Wherever a group level element is listed, the value shown applies to all subordinate elements unless shown separately.
