

PULSED IRRIGATION EVACUATION (PIE)

ISSUE DATE: July 3, 2007

AUTHORITY: [32 CFR 199.2](#) and [32 CFR 199.4\(d\)\(3\)\(iii\)](#)

I. CPT¹ PROCEDURE CODES

91123, 99511

II. HCPCS CODES

E0350, E0352

III. DESCRIPTION

Pulsed Irrigation Evacuation (PIE) is an automated enema in which small pulses of warm tap water are delivered into the rectum, serving to rehydrate feces and promote peristalsis. The system consists of a speculum, tubing, a disposable collection container, and an electrical unit that delivers positive and negative air pressure through the tubing.

IV. POLICY

PIE may be covered for the treatment of patients with neurogenic bowel who have failed conservative therapy with bowel retraining (e.g., suppositories, digital stimulation, abdominal massage, enemas).

V. EXCLUSIONS

PIE is excluded when any of the following contraindications exist:

- A. Abdominal surgeries in the past 12 months.
- B. Renal insufficiency.
- C. Acute diverticulitis.
- D. Impactions not in the colon, i.e., ileus.
- E. Integrity of the colon is suspect (suspected perforation).
