

HOSPITAL INPATIENT REIMBURSEMENT IN LOCATIONS OUTSIDE THE 50 UNITED STATES AND THE DISTRICT OF COLUMBIA

ISSUE DATE: September 9, 2004

AUTHORITY: 32 CFR 199.1(b) and 32 CFR 199.14(m), (n), and (o)

I. APPLICABILITY

This policy is mandatory for reimbursement of all hospital inpatient services provided in the locations identified in [paragraph IV.B](#). This policy revises, replaces, and supersedes the previously issued policy, effective October 1, 2004, for hospital reimbursement in the Philippines. Puerto Rico follows Continental United States (CONUS) based reimbursement methodologies used for the 50 United States and the District of Columbia.

II. ISSUE

How are specified inpatient hospital services reimbursed in the locations specified in [paragraph IV.B](#)?

III. POLICY

The institutional per diem for those specified locations outside the 50 United States and the District of Columbia is the maximum amount TRICARE will authorize to be paid for inpatient services on a per diem basis. The allowable institutional rates for those specified locations outside the 50 United States and the District of Columbia, shall be the lesser of (a) billed charges or; (b) the amount based on prospectively determined per diems which are adjusted by a country specific index factor.

IV. BACKGROUND

Reimbursement Systems:

A. General.

1. Payment for inpatient hospital stays in specified locations outside the 50 United States and the District of Columbia, are made utilizing the lesser of (a) billed charges or (b) the prospectively determined per diems adjusted by a country specific index.

2. The prospectively determined per diem rates for specified locations outside the 50 United States and the District of Columbia, are developed into reimbursement groupings by utilizing diagnosis codes as contained in the International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM). The per diem rates are the maximum allowable

TRICARE REIMBURSEMENT MANUAL 6010.55-M, AUGUST 1, 2002

CHAPTER 1, SECTION 34

HOSPITAL INPATIENT REIMBURSEMENT IN LOCATIONS OUTSIDE THE 50 UNITED STATES AND THE DISTRICT OF COLUMBIA

amounts that TRICARE shall reimburse. The National U.S. per diem rate is multiplied by a unique country specific index factor which adjusts the National U.S. per diems for the applicable country. The country specific hospital per diem, for those specified locations outside the 50 United States and the District of Columbia is the product of the National U.S. per diem and the country specific index.

B. Applicability.

1. This payment system applies to all hospitals providing inpatient services in:

- a. The Philippines.
- b. Panama.
- c. Other as designated by the Government.

2. This payment system will be applied by the foreign claims processor. It applies to hospital inpatient services furnished to retirees or their eligible family members or Standard Active Duty Family Members (ADFM) falling under the claims processing jurisdiction of the foreign claims processor.

3. Institutional providers accepting, admitting and treating TRICARE beneficiaries will receive the per diem reimbursement on applicable hospital services included on inpatient claims. This payment system is to be used regardless of the type of hospital inpatient services provided. The prospectively determined per diem rates established under this system are all-inclusive and are intended to include, but not be limited to, a standard amount for nursing and technician services; room, board, and meals; drugs including any take home drugs; biologicals; surgical dressings, splints, casts, Durable Medical Equipment (DME) for use in the hospital and is related to the provision of a surgical service, procedure or procedures, equipment related to the provision and performance of surgical procedures; laboratory services and testing, X-ray and other diagnostic services directly related to the inpatient episode of care; special unit operating costs, such as intensive care units; malpractice costs, if applicable, or other administrative costs related to the services furnished to the patients, recordkeeping and the provision of records; housekeeping items and services; and capital costs.

4. The per diem rates do not include such items as physician fees, irrespective of the physician's employment status with the hospital. The per diem rates do not include other professional providers (e.g., nurse anesthetist) recognized by TRICARE and who render directly related inpatient services and bill independently from the hospital for them. A valid primary ICD-9-CM code or narrative description of services must be submitted by the hospital or institutional provider. The medical description provided shall be able to support development of the claim by the overseas claims processor prior to reimbursement.

C. Country Specific Index. The country specific index is a factor obtained from the World Bank's International Comparison Program. The index factor, known as Purchasing Power Parity (PPP) conversion factor, is based on a large array of goods and services or market

basket within the specific country which is then standardized and weighted to a U.S. standard and currency. The World Bank defines PPP conversion factor as: “number of units of a country’s currency required to buy the same amount of goods and services in the domestic market that a U.S. dollar would buy in the U.S.” The use of the country specific index enables a conversion and therefore creates parity between the U.S. and the specific country in the purchasing of the same amount and type of medical services. TRICARE is utilizing the World Bank’s International Comparison Program country specific index as provided in [Figure 1-34-1](#).

D. Institutional Payment Rates.

1. The Policy and Statistical Analysis Services contractor shall annually calculate the U.S. National **per diems** and provide them electronically to the TRICARE Management Activity (TMA), which will be included in [Figure 1-34-2](#) and [Figure 1-34-3](#). The provided data will contain the ICD-9-CM **code, code** range, or groups of related diagnosis codes. The first three digits of the principal ICD-9-CM diagnosis code determines placement into a diagnosis group as well as a reimbursement group. The data will also contain a description of the diagnosis ICD-9-CM groups. The rate for each group is the average U.S. allowed amounts per day in short-stay hospitals for all ICD-9-CM diagnoses in the particular group plus an add-on to reimburse for capital costs. The add-on percentage will be determined by the above contractor using the U.S. data and the amount will be built-in into the per diem rate for each group. The rate file will also designate the effective date of the per diem rates. The above contractor shall also communicate the country specific factor to TMA annually or as dictated by the World Bank’s International Comparison Program or as determined by TMA. The above contractor shall also provide the country specific adjusted per diem files, electronically to TMA, which will be provided to the overseas claims processor by TMA at least annually, or as specifics dictate. The adjusted per diems will be available at: <http://www.tricare.mil/tma/foreignfee/>.

2. The rates setting methodology was developed as follows:

a. A rate setting methodology utilizing the first three digits of a primary diagnosis code.

b. Eighteen diagnosis groupings were defined and designed based on the groupings and definitions contained in the ICD-9-CM publication. For example, Group 1 is defined as ICD-9-CM codes 001 to 139, or Infectious and Parasitic Diseases. The first three digits of a primary diagnosis code are utilized for placement into one of the eighteen groups.

c. The payment rate for each of the 18 diagnostic groups was the average allowed amount per day over all the ICD-9-CM codes in a diagnosis group, based upon the claim’s primary diagnosis, plus an add-on to reimburse for capital costs.

d. Group payments were calculated by dividing total allowed charges by total inpatient days for the group.

TRICARE REIMBURSEMENT MANUAL 6010.55-M, AUGUST 1, 2002

CHAPTER 1, SECTION 34

HOSPITAL INPATIENT REIMBURSEMENT IN LOCATIONS OUTSIDE THE 50 UNITED STATES AND THE DISTRICT OF COLUMBIA

e. Once the 18 groupings were defined, certain unique admissions were identified for reimbursement separately from the 18 groupings. These are listed in [Figure 1-34-3](#).

E. Payments.

1. General. The per diem group rate will be based upon the first three digits of the primary diagnosis code. The TRICARE allowable charge and amount reimbursed for hospital inpatient care shall be the lesser of:

a. Actual billed charge for hospital inpatient care; or

b. The amount determined based upon the country specific index factor adjusted per diem. The TRICARE U.S. National per diem rate multiplied by the country specific index factor is the country specific hospital per diem. This per diem is multiplied by the number of covered days of hospital inpatient care and equals the maximum amount allowed by TRICARE to be paid for the episode on inpatient care.

2. Only the primary or principal diagnosis for an admission will be taken into consideration when determining the group for a payment rate. This diagnosis is the condition established after study to be chiefly responsible for the admission. Only one payment group can be assigned to each independent episode of inpatient care. Each institutional claim for service reimbursement must contain a valid ICD-9-CM code or narrative description of services, and must be used to represent the primary diagnosis for inpatient admission. If a valid diagnosis code or narrative description is not supplied by the institutional provider, it must be developed and supported by the overseas claims processor. Development of an institutional claim should contain the necessary elements to satisfy TRICARE Encounter Data (TED) requirements.

F. Beneficiary Change in Eligibility Status. Since payment is on a per diem basis, the hospital claims for services shall be paid for the days the beneficiary is TRICARE eligible and denied for the days the beneficiary is not TRICARE eligible.

G. Beneficiary Cost-Shares. Inpatient cost-shares as contained in [Chapter 2, Section 1](#), for non-Diagnosis Related Group (DRG) facilities shall be applicable to TRICARE's hospital allowable charge.

H. Updating Payment Rates. Updates, additions, changes, revisions, or deletions to the ICD-9-CM codes or country specific index or per diems shall be communicated to the overseas claims processor and be considered as routine updates to this payment system and processed under TRICARE Operations Manual (TOM), [Chapter 1, Section 4, paragraph 2.4](#).

I. The overseas claims processor shall maintain the current year and two immediate past years' iterations of the country specific index factor adjusted per diems.

J. There is no TRICARE waiver process applicable to hospitals in specified locations outside the 50 United States and the District of Columbia for institutional inpatient rates.
