

Electrical Stimulation Of Bone

Issue Date: October 6, 1988

Authority: [32 CFR 199.4\(c\)\(2\)\(i\)](#)

1.0 CPT¹ PROCEDURE CODES

20974 - 20975, 20670, 20680

2.0 HCPCS PROCEDURE CODES

E0747 - E0749, E0760

3.0 DESCRIPTION

Electrical stimulation to augment bone repair can be accomplished through one of the following methods:

3.1 A totally invasive method in which electrodes and power pack are surgically implanted within the extremity.

3.2 A semi-invasive method in which electrodes penetrate the fracture and the power pack is externally placed and the leads are connected to the inserted electrodes.

3.3 A totally noninvasive method in which the electrodes are placed over the cast surface and are connected to an external power pack.

4.0 POLICY

4.1 Use of the invasive and semi-invasive types of devices are covered for nonunion of long bone fractures.

4.2 Use of the noninvasive type of device is covered for the following procedures:

- Nonunion of long bone fractures.
- Failed fusion.
- Congenital pseudo-arthrooses.

TRICARE Policy Manual 6010.57-M, February 1, 2008

Chapter 4, Section 6.2

Electrical Stimulation Of Bone

4.3 Use of the invasive or noninvasive type of device is covered as an adjunct to spinal fusions to increase the probability of fusion success for:

4.3.1 Patients at high risk for pseudo-arthritis, including those patients with:

- One or more failed fusions;
- Grade 2 or 3 spondylolisthesis;
- Fusions at more than one level, or

4.3.2 Fusions performed on patients considered to be at high risk (i.e., smokers, obese, etc.).

4.4 Nonunion, for all types of devices. A nonunion is considered to be established when the fracture site shows no visibly progressive signs of healing.

4.5 When determined to be medically necessary, the electrical bone stimulator may be rented following the durable medical equipment reimbursement procedures outlined in [Chapter 8, Section 2.1](#).

4.6 When determined to be medically necessary, repairs, adjustments and accessories necessary for the effective functioning of the device, and removal and replacement of the covered device, as well as associated surgical costs are covered.
