### 2.0 DESCRIPTION

Category III codes are a set of temporary codes for emerging technology, services, and procedures. These codes are used to track new and emerging technology to determine applicability to clinical practice. When a Category III code receives a Category I code from the American Medical Association (AMA) it does not automatically become a benefit under TRICARE. However, the codes that may have moved from unproven to proven must be forwarded to the Office of Medical Benefits and Reimbursement Division (MB&RD) for coverage determination/policy clarification.

### 3.0 POLICY

**3.1** Category III codes are to be used instead of unlisted codes to allow the collection of specific data. TRICARE has not opted to track Category III codes at this time.

**3.2** Category III codes are excluded from coverage since clinical safety and efficacy or applicability to clinical practice has not been established.

### 4.0 EXCEPTIONS

**4.1** U.S. Food and Drug Administration (FDA) Investigational Device Exemption (IDE) (Category B) clinical trial. See [Chapter 8, Section 5.1](#).

**4.2** Category III code 0073T is a covered service as listed in [Chapter 5, Section 3.1](#).

**4.3** Category III codes 0075T and 0076T are covered codes as outlined in [Chapter 4, Section 9.1](#).

**4.4** Category III codes 0099T and 0308T are covered codes as outlined in [Chapter 4, Section 21.1](#).
