

Robotic Surgery

Issue Date: August 14, 2018

Authority: [32 CFR 199.4\(c\)\(2\)\(i\)](#)

Revision: C-30, August 15, 2018

1.0 HCPCS CODE

S2900

2.0 DESCRIPTION

Surgical use of robotics, or computer-assisted surgical systems, is aimed at improving surgical outcomes through increased precision in a setting of minimal invasiveness. It is a method of performing the procedure and not a separate service. This policy includes any type of robotically-assisted surgery.

3.0 POLICY

Robotic-assisted surgery shall be cost-shared to the same extent as conventional surgery when the device being used has been approved by the U.S. Food and Drug Administration (FDA). However, additional reimbursement shall not be provided for the use of robotic surgical devices. Additional professional or technical reimbursement shall not be made when a surgical procedure is performed using robotic assistance. Separate reimbursement shall not be allowed for the robotic surgical technique.

4.0 EXCLUSION

Robotic surgery shall not be cost-shared for surgical procedures otherwise excluded under TRICARE.
