

Systems Development

Revision: C-92, July 14, 2021

1.0 TRANSITION

1.1 Upon reprocurement of a TRICARE contract, an incumbent contractor may succeed itself or a new contractor may be awarded the contract. The Defense Health Agency (DHA) will coordinate transition activities with the incumbent/new contractor and Defense Finance and Accounting Service (DFAS)/U.S. Coast Guard (USCG)/Public Health System (PHS), during the transition-in period. When the contract is awarded to a new contractor, the following actions will be taken by the outgoing and incoming contractors.

1.2 The outgoing contractor shall stop all allotments by sending a “stop allotment notice” to DFAS after **they receive** the last payment under their contract. To stop allotments, the notice has to be at DFAS by the sixth day of the preceding month, for example, to stop for May 1st, the “stop allotment notice” has to be at DFAS by April 6th.

1.3 The incoming contractor shall send an “allotment request” to DFAS no later than the sixth day of the month prior to the first payment being due. For example, to start May 1st, the “start request” must be at DFAS by April 6th.

2.0 SYSTEM INTERFACE MEETINGS

2.1 The incoming contractor shall schedule a systems interface meeting with the Government within 30 days of the transition start date. The purpose of the meeting is to review requirements for the establishment of connectivity with Government systems and applications.

2.2 The incoming contractor’s Facility Security Officer (FSO) shall attend a meeting with DHA Personnel Security Branch (PSB) to review Personnel Security Requirements and the procedures for requesting background checks and Common Access Cards (CACs) in accordance with the TRICARE Systems Manual (TSM), [Chapter 1, Section 1.1](#). The FSO shall undergo the required background check and obtain the necessary trustworthiness certification (Automated Data Processing/Information Technology (ADP/IT)) prior to approving requests for the remaining staff in the incoming contractor’s organization.

2.3 User Access Requirements

The incoming contractor shall ensure personnel complete appropriate background and security checks in accordance with the TSM, [Chapter 1](#).

2.4 Connectivity Requirements

2.4.1 The incoming contractor shall collaborate with the Government to establish the required interfaces with Government systems and applications. The contractor shall complete the submission of required forms (e.g., Business to Business Questionnaire, DD Form 2875, etc.) in accordance with the TSM, [Chapter 1](#).

2.4.2 Data Transmission Start Up

2.4.2.1 The DHA will coordinate Business to Business (B2B) Gateway and DFAS connectivity for all contractors. DHA will also coordinate integration testing of the connectivity and data transmission. DHA and the contractor will collaborate with DFAS/USCG/PHS on the development of a test plan and schedule.

2.4.2.2 At the start-up planning meeting, each contractor on the telecommunication network shall provide to DHA the name, address, and telephone number of the person who will serve as a technical POC (update when a change occurs). The contractors shall also provide a separate computer center (Help Desk) number to DHA that the DHA computer operator can use for data transmission problem resolution.

2.5 Systems Development

Approximately 60 days prior to the start of health care delivery (SHCD), the DHA (or its designees) will review the non-claims processing systems and the telecommunications interconnections between these systems. The contractor shall conduct a demonstration of the system(s) capabilities, so the Government can determine whether the systems satisfy TRICARE contract requirements. This includes the telecommunications links between the contractor, DHA and Defense Enrollment Eligibility Reporting System (DEERS). The contractor shall effect any modifications required by DHA prior to SHCD.

2.6 Claims Processing System and Operations

During the period between the date of award and the SHCD, the incoming contractor shall, pursuant to the Integrated Master Plan/Integrated Master Schedule (IMP/IMS), meet the following contractor file conversions and testing requirements:

2.6.1 Contractor File Conversions and Testing

2.6.1.1 The incoming contractor shall perform initial conversion and testing of all Automated Data Processing (ADP) files (e.g., provider files, claims history files, and beneficiary history) no later than 30 days following receipt of the files from the outgoing contractor(s). The Government will conduct integration testing to validate the contractor's internal interfaces to each of the TRICARE Military Health Systems (MHS) Information Management/Information Technology (IM/IT). This testing will verify the contractor's system integration, functionality, and implementation process. The incoming contractor shall be responsible for the preparation and completion of Integration Testing 45 days prior to the SHCD.

2.6.1.2 DHA Test Managers will work with the contractor to plan, execute and evaluate the Integration Testing efforts. The contractor shall identify a primary and a back-up Testing Coordinator to

work with the DHA Test Managers. The Testing Coordinator is responsible for contractor testing preparations, coordination of tests, identification of issues and their resolution, and verification of test results. The contractor Testing Coordinators shall use a Government provided web application to report and track issues and problems identified during integration testing.

2.7 Data

The outgoing contractor shall provide to DHA (or, at the option of DHA, to a successor/ incoming contractor) all DHA shall required information to facilitate transitions from the contractor's operations to the incoming contractor's operations under any successor contract. The outgoing contractor shall provide all files in a non-proprietary format; and the incoming contractor shall include such file specifications and documentation as necessary for file interpretation. Such information may include, but is not limited to, the following:

- The data contained in the contractor's enrollment information system.
- The data contained in the contractor's claims processing systems.
- Information about the management of the contract that is not considered, under applicable Federal law, to be proprietary to the contractor.

2.8 Transaction Testing

In the absence of the inclusion of testing requirements in updated Health Insurance Portability and Accountability Act (HIPAA) legislation, contractors shall comply with testing requirements in accordance with the Contracting Officer (CO) direction. At a minimum, testing shall include the following:

2.8.1 Contractors shall test their capability to create, send, and receive compliant transactions. Contractors shall provide written evidence (e.g., certification from a transaction testing service) of successful testing of their capabilities to create, send, and receive compliant transactions to the CO no later than 60 days prior to the SHCD.

Note: Where failures occur during testing, the contractor shall make necessary corrections and re-test until they achieve a successful outcome.

2.8.2 Contractors shall test their capability to process standard transactions. This testing shall be "cradle-to-grave" testing from receipt of the transactions, through processing, and completion of all associated functions including creating and transmitting associated response transactions. Testing involving the receipt and processing of claims transactions shall also include the submission to and acceptance by the DHA of TRICARE Encounter Data (TED) records and the creation of contract compliant electronic Explanation Of Benefits (EOB). The contractor shall complete "cradle-to-grave" testing no later than 30 days prior to the SHCD.

2.9 Phase-Out of the Contractor's Claims Processing Operations

Upon notice of award to another contractor, the outgoing contractor shall undertake the following phase-out activities regarding services as an outgoing contractor.

2.9.1 Transfer of Electronic File Specifications

The outgoing contractor shall provide to the incoming contractor, no later than three days following award announcement or upon direction of the CO, electronic copies of the record layouts with specifications, formats, and definitions of fields, and data elements, access keys and sort orders, for the following:

- Beneficiary History Files.
- Claims History Files.
- The TRICARE Encounter Provider Files (TEPRVs).
- The Enrolled Beneficiary and Primary Care Manager (PCM) Assignment Files.
- Mental Health Provider Files: The outgoing contractor shall provide the incoming contractor with accurate provider payment information on all mental health providers paid under the TRICARE inpatient mental health per diem payment system. This shall include provider name; Tax Identification Number (TIN); address including zip code; high or low volume status; if high volume, provide the date the provider became high volume; and the current per diem rate along with the two prior year's per diem amounts. The providers under the per diem payment system must be designated by Medicare, or meet exemption criteria, as exempt from the inpatient mental health unit. The unit would be identified as the provider under the TRICARE inpatient mental health per diem payment system.

2.9.2 Transfer Of ADP Files

By the 15th day following the Transitions Specifications Meeting, the outgoing contractor shall prepare in non-proprietary electronic format and transfer to the incoming contractor or DHA unless otherwise negotiated by the incoming and outgoing contractors, all specified ADP files, such as the Provider and Pricing files, in accordance with specifications in the official transition schedule and shall continue to participate in preparation and testing of these files until they are fully readable by the incoming contractor or DHA.

2.9.3 Outgoing Contractor Weekly Shipment Of History Updates

The outgoing contractor shall transfer to the incoming contractor, in electronic format, all beneficiary history and deductible transactions occurring from the date of preparation for shipment of the initial transfer of such history files and every week thereafter beginning the 120th day prior to the SHCD until such a time that all processing is completed by the outgoing contractor in accordance with the specifications in the official transition schedule.

3.0 TED RECORDS

3.1 The incoming contractor shall ensure the TED record complies with the TSM, [Chapter 2](#) and the contract.

3.2 The incoming contractor shall ensure the TEPRV complies with the TSM, [Chapter 2](#) and the contract.

3.3 The incoming contractor shall demonstrate the ability to successfully create and submit all TED record types and TEPRVs prior to SHCD. This includes, but is not limited to, adjustment, denial and cancellation records.

4.0 DUPLICATE CLAIMS SYSTEM (DCS)

4.1 Incoming And Outgoing Contractor Requirements

4.1.1 The incoming contractor shall access the web-based DCS via the Patient Encounter Processing and Reporting (PEPR) Portal in accordance with the TSM, [Chapter 4](#) and ensure the connection has been tested and is accessible.

4.1.2 The contractor shall participate in Government furnished DCS training. Training will be scheduled as part of the IMP/IMS.

4.1.3 The Government and contractor shall determine the date when an incoming contractor will assume full responsibility for resolving all existing potential duplicate claim sets from the outgoing contractor (including completing existing recoupments), and for all new potential duplicate claim sets, during transition meetings. The contractor shall add the date to the transition plan/schedule.

4.1.4 During transition, the Government will provide DCS training to the incoming contractor. Training will occur between 120 days prior to the SHCD and not later than 60 days following the SHCD. The incoming contractor shall coordinate training needs in accordance with the transition plan/schedule. The contractor shall meet all user access requirements prior to the initiation of training.

4.1.5 The incoming contractor shall begin using the DCS to resolve identified potential duplicate claim sets "owned" by the incoming contractor 120 days following the SHCD.

4.1.6 The incoming contractor shall begin processing potential duplicate claim sets transferred from the outgoing contractor 150 days following the SHCD.

4.1.7 For each regional contract for which a contractor is responsible, the contractor shall identify at least one individual to serve as the DCS Point of Contact (POC). Contractor DCS POCs shall be individuals who are, or will be, trained in the use of the DCS, and who are able to perform the required research and determine whether a particular claim is within their processing jurisdiction. The contractor shall provide the name(s), title(s), business address(es), and business telephone number(s) of their DCS POCs to the CO, with courtesy copies to the Contracting Officer Representatives (CORs) and to the DHA DCS Program Representative. The contractor shall provide the DCS POCs to the CO no later than two weeks prior to implementation of the DCS.

4.1.8 DHA will provide each contractor with the list of all DCS POCs. Whenever a new contract is awarded, DHA will notify all contractors of the new contractor's DCS POC. Once the initial listing is provided to the contractors, each contractor shall maintain the listing and keep DHA and the other contractors informed of any changes.

4.1.9 In accordance with the Financial Procedures in the Transition Plan, the contract, and the TOM, the outgoing contractor shall package and forward to the incoming contractor, refund checks received and offsets taken for recoupments associated with duplicate claims payments and recoupment files associated with in progress duplicate claim recoupment 120 days following SHCD.

4.1.10 On the last day of the fourth month following the start of SHCD, or upon direction of the Government, the outgoing contractor shall cease researching *Open* claim sets and initiating new recoupments associated with duplicate claim payments. The outgoing contractor shall also cease entering refund data and linking adjustment data in the DCS for *Pending* and *Validate* claim sets.

4.1.11 The outgoing contractor shall move all *Open* DCS claim sets to a *Pending, Validate, or Closed* status by the last day of TED submissions (as defined by the transition plan).

4.1.12 When the outgoing contractor has ceased entering refund and adjustment data on the DCS, refunds may be received and/or TED adjustments may still be submitted for claims in *Open* and *Pending* sets. In this case, the incoming contractor **shall** resolve the set without knowing the amount of the refund received by the outgoing contractor.

4.1.13 If the actual recoupment amount was zero when the set was transferred from the outgoing contractor, the incoming contractor **shall** apply the adjustment to the set while leaving the actual recoupment amount as zero dollars. Resolution would result in a *Validate* status, **and** the incoming contractor **shall submit an explanation** that the outgoing contractor did not enter the actual recoupment amount.

4.1.14 Following the SHCD, the DCS will begin displaying identified potential duplicate claim sets for which the incoming contractor **shall resolve**. The incoming contractor shall begin using the DCS to resolve potential duplicate claim sets in accordance with the TSM, [Chapter 4](#) and the IMP/IMS requirements.

4.1.15 The incoming contractor shall assume full responsibility for resolving all existing potential duplicate claim sets from the outgoing contractor (including completing existing recoupments) and for all new potential duplicate claims sets as agreed upon during the transition meeting.

4.2 Phase-Out of the Automated TRICARE DCS

The outgoing contractor shall phase-out the use of the automated TRICARE DCS in accordance with TSM, [Chapter 4](#) and IMP/IMS.

5.0 PERFORMANCE ASSESSMENT REPORTING

5.1 Submission Requirements

The contractor shall submit reports and plans for transition in and transition out as identified by the DD Form 1423, Contract Data Requirements List (CDRL), located in Section J of the applicable contract.

5.2 Training

The incoming contractor shall schedule initial training on **deliverable** submission within 30

days after award. **The Government will provide** additional training for new users throughout the contract upon **contractor** request.

5.3 Technical Support

The Government will provide performance assessment reporting technical support during the business week. **The Government will provide a** POC for access and deliverable submission during initial training.

6.0 INTERCONNECTIVITY BETWEEN THE CONTRACTOR AND DEFENSE HEALTH AGENCY- GREAT LAKES (DHA-GL) [THE SPECIFIED AUTHORIZATION STAFF (SAS) FOR ARMY, AIR FORCE, NAVY, MARINE CORPS, **SPACE FORCE**, COAST GUARD, AND NATIONAL GUARD TRICARE PRIME REMOTE (TPR) ENROLLEES]

6.1 The contractor shall provide access for **referral** entry and edit **in** existing systems supporting this contract. The contractor shall propose one of the following access options:

- Government staff physically located in Great Lakes, IL, accessing the contractor's system; or
- Contractor staff physically located in Great Lakes, IL, accessing the contractor's system, and Government personnel performing a backup role in the event contractor personnel are unavailable due to annual or sick leave or another reason.

6.2 The contractor shall create a standard management listing for all pending referrals requiring SAS review. The **contractor shall make the** listing available on-line to the SAS. The contractor shall propose the **listing** design to the SAS for approval 30 days prior to the SHCD.

- END -
