

Category III Codes

Issue Date: March 6, 2002

Authority: [32 CFR 199.2\(b\)](#) and [32 CFR 199.4\(g\)\(15\)](#)

1.0 DESCRIPTION

Category III codes are a set of temporary codes for emerging technology, services, and procedures. These codes are used to track new and emerging technology to determine applicability to clinical practice. When a Category III code receives a Category I code from the American Medical Association (AMA) it does not automatically become a benefit under TRICARE. However, the codes that may have moved from unproven to proven must be forwarded to the Office of Medical Benefits and Reimbursement Section (MB&RS) for coverage determination/policy clarification.

2.0 POLICY

2.1 Category III codes are to be used instead of unlisted codes to allow the collection of specific data. TRICARE has not opted to track Category III codes at this time.

2.2 Category III codes are excluded from coverage, **unless specifically noted in policy**, since clinical safety and efficacy or applicability to clinical practice has not been established.
