

Psychiatric And Substance Use Disorder (SUD) Partial Hospitalization Program (PHP) Standards

Issue Date: July 14, 1993

Authority: [32 CFR 199.6\(b\)\(4\)\(xii\)](#)

1.0 ISSUE

Psychiatric and SUD PHP Standards.

2.0 DESCRIPTION

A PHP is a treatment setting capable of providing an interdisciplinary program of medically monitored therapeutic services, to include management of withdrawal symptoms, as medically indicated. Services may include day, evening, night, and weekend treatment programs which employ an integrated, comprehensive and complementary schedule of recognized treatment approaches. Partial hospitalization is a time-limited, ambulatory, active treatment program that offers therapeutically intensive, coordinated, and structured clinical services within a stable therapeutic environment. Partial hospitalization is an appropriate setting for crisis stabilization, treatment of partially stabilized mental health disorders, to include substance disorders, and a transition from an inpatient program when medically necessary.

3.0 POLICY

3.1 PHPs must be either a distinct part of an otherwise authorized institutional provider or a freestanding program. The treatment program must be under the general direction of a licensed TRICARE authorized physician employed by the PHP to ensure medication and physical needs of all the patients are considered. The primary or attending provider must be an authorized mental health provider, operating within the scope of his/her license. These categories include physicians, clinical psychologists, Certified Psychiatric Nurse Specialists (CPNSs), Clinical Social Workers (CSWs), marriage and family counselors, TRICARE Certified Mental Health Counselors (TCMHCs), pastoral counselors, and supervised mental health counselors who must practice under the supervision of TRICARE authorized physicians.

3.2 Authorization:

3.2.1 Hospital-Based PHPs. When a hospital is a TRICARE authorized provider, the hospital's PHP also shall be considered a TRICARE authorized provider. Separate TRICARE certification of a hospital-based PHPs is no longer required.

3.2.2 Freestanding PHPs must enter into a participation agreement with the Director, Defense Health Agency (DHA), or designee.

3.3 In addition, in order for a freestanding PHP to be authorized, the PHP shall comply with the following requirements:

3.3.1 The PHP shall be currently accredited by the Joint Commission (TJC), the Commission on Accreditation of Rehabilitation Facilities (CARF), the Council on Accreditation (CoA), or an accrediting organization approved by the Director, DHA. The regional contractor may submit, via the TRICARE Regional Office (TRO), additional accrediting organizations for TRICARE authorization, subject to approval by the Director, DHA.

3.3.2 The PHP shall be licensed as a PHP to provide PHP services within the applicable jurisdiction in which it operates.

3.3.3 The PHP shall accept the allowable PHP rate, as provided in 32 CFR 199.14(a)(2)(ix), for freestanding PHPs and the TRICARE Reimbursement Manual (TRM), Chapter 13, Section 2, paragraph 3.7 for hospital-based PHPs as payment in full for services provided.

3.3.4 The PHP shall comply with all requirements applicable to institutional providers generally concerning accreditation requirements, concurrent care review, claims processing, beneficiary liability, double coverage, utilization and quality review, and other matters.

3.3.5 The PHP shall not be considered an authorized provider nor may any benefits be paid to the facility for any services provided prior to the date the facility is approved by the Director, DHA, or designee.

3.3.6 All diagnostic and therapeutic mental health **and SUD** services must be provided by an authorized mental health provider. This includes all psychotherapy (individual, group, family or conjoint, psychoanalysis, collateral), psychological testing and assessment. [Exception: PHPs that employ individuals with master's or doctoral level degrees in a mental health discipline who do not meet the licensure, certification, and experience requirements for a qualified mental health provider but are actively working toward licensure or certification, may provide services within the all-inclusive per diem rate but the individual must work under the clinical supervision of a fully qualified mental health provider employed by the PHP.] All other program services shall be provided by trained, licensed staff.

3.3.7 Family therapy is an integral part of the treatment of children and adolescents and must be included in their mental health treatment plans. If the family is not in the area, the **child or adolescent** patient is probably not a candidate for partial care as individuals in this program return to their home setting daily, and effective family interaction is essential. If the family or patient is not cooperative in participating in family therapy, they may not be viable candidates for a partial program. By accepting a child or adolescent under the age of 21 for admission, a partial program is acknowledging that it can provide the specific treatment appropriate to that individual's needs and is responsible for taking only those individuals whom it feels it can help through the development of an appropriate treatment program designed to encompass family therapy and maximize the patient's ability to function in one or more major life activities. The requirement for family therapy is not considered met by telephonic therapy or multifamily group therapy. (See Chapter 7, Section 3.12.) If family therapy is clinically contraindicated, an exception to this requirement may be granted **on a case-by-case basis** by the **clinical director, or designee**.

TRICARE Policy Manual 6010.57-M, February 1, 2008

Chapter 11, Section 2.5

Psychiatric **And Substance Use Disorder (SUD)** Partial Hospitalization Program (PHP) Standards

3.3.8 **Case management** services required. The facility must provide **case management** services **that help** assure the patient appropriate living arrangements after treatment hours, transportation to and from the facility, arrangement of community based support services, referral of suspected child abuse to the appropriate state agencies, and effective after care arrangements, at a minimum.

3.3.9 Educational services required. Programs treating children and adolescents must ensure the provision of a state certified educational component which assures that patients do not fall behind in educational placement while receiving partial hospital treatment. The cost of educational services will not be funded separately from the per diem rate. The hours devoted to education do not count toward the therapeutic program.

3.3.10 The PHP shall enter into a **written** participation agreement with the Director, **DHA**, or **designee**. (See **Section 12.3 and Addendum F**.)
